

### Challenge #3: Layout and Menu Elements

Objectives: Apply Layout and menus in relation to the planned website based on your learning in w3school.

On my planned website I want my navigation and menus on top. The navigation bar will be on the top-left and the menus will be on the top-right. There will a button explore that will go directly to the content of the website.

When on tablet and phones screen sizes it will have a button where the menus will appear when click.
